FeverAll® The Only Brand of Acetaminophen in Suppository Form
 What's a parent to do when a child can't tolerate oral fever relief products because of vomiting, nausea, bad taste or irritability? Or when allergies to additives in liquids are a problem? The answer is FeverAll® Acetaminophen Suppositories — fighting fever like no other product available.

- Easy to administer
- Accurate dosing every time
- Available in 3 strengths for children 3 months to 12 years:
 80 mg • 120 mg • 325 mg

FeverAll® The easy way to fight fever in children.

Childrens' Dosage Recommendations

When nausea, vomiting or irritability make oral fever products too hard for your child to take, FeverAll® can help. FeverAll® is a suppository form of acetaminophen, a common fever remedy you may already know and trust.

With FeverAll® your child gets the exact dose needed — no mess, no doubt.

AGE	INFANTS' 80 mg	CHILDRENS' 120 mg	JR. STRENGTH 325 mg
